Q1. In the wake of economic deceleration, the challenge is to minimise livelihood losses. Hence is time to formulate a wage employment-based national urban livelihood scheme similar to MGNREGS. Comment 150 words

Indian old
People in urban centres faced more challenges due to the economic downfall.

Issues with Urban Employment

- ① Informal nature of job - construction, daily wage workers
- ② Contractualisation and casualisation of workforce in urban centre.
- ③ Useless and careless activities - less scope for wage rise
- ④ Rise of social insecurity
- ⑤ low female labour force participation rate.
- (FLFPR)

Need for National Urban Employment Guarantee Scheme

- ① legal right to work, right to minimum wage and unemployment allowances
- ② check urban poverty, provide social security and also check severe migration due to disruptions like COVID
- ③ Fill gap of labour requirement due to rising urbanization and Industrialisation
- ④ Help increase female LFPR
- ⑤ Formalisation of economy.

Such schemes if focused on tier 2, 3 cities, it can bring more equitable and inclusive growth.

Q2. Very purpose of micro-finance is to creation of assets, income security and poverty alleviation through micro credit to poor people. Evaluate the recent RBI microcredit guidelines in meeting above objectives. 150 words

Micro finance deals with financial services (saving, loans) to low income households. They are regulated by RBI as part of NBFCs.

RBI guidelines

- Uniform definitions of beneficiary
- Rural Household income $< \frac{1.25}{\text{lakh}}$
- Urban Household income $< \frac{2}{\text{lakh}}$

- Removal of cap on interest rate

- voluntary setting of maximum, average, minimum interest rates
- collateral free loan.

Benefits

- ① More scope for lending by various MFIs (cooperatives, SHGs, credit societies)

- ok dir
but
provides
your account
other
facilities
- ② Financial Inclusion - Hence income security with maturity
 - ③ Easy to access loan period as long term - Asset creation (Household, toilets, machinery purchase)
 - ④ Financial empowerment of SHGs - poverty alleviation, women empowerment

Concerns

- Increased competition, higher interest rates
Focus on profit by MFI rather social goals
Short term loans

However these guidelines are said to be empowering and providing autonomy to MFI. It can lead to achieve objective of MFIs

Q3. Many commentators see the rise of cryptocurrency as a bubble, while enthusiasts of cryptocurrencies see it as unstoppable. Comment 150

Cryptocurrency are digital currency. It is created online and is decentralised ie central government (or Bank) have no control over its supply. Examples - Bitcoin, Dogecoin, Etherium etc.

Cryptocurrency as Bubble

- ① Decentralised nature
- ② No physical existence.
- ③ Limited number of coins
- ④ Price fluctuations due to demand and supply - Most of cryptocurrency are controlled by few people / organisations
- ⑤ Security risks involved with these cryptocurrencies may attract government regulations. Hence people may leave and go to other assets.

Potential Benefits of Cryptocurrencies

- Safety and security feature of ledger system - helpful in safe transactions
- Promoting cashless / less-cash economy
- Many countries looking at it as an alternative to dollars or other International currency
- Faster settlements of transactions

Due to benefits central banks

are looking for centralised cryptocurrencies
India should also accept the technology
with proper safeguards to reap its benefits.

Q4. Do you think that privatization of public sector banks is panacea to the existing issues in banking system? Justify your view 150 words

Government has amalgamated 12 banks into 3 national banks and looking to foocgo state holding in public sector banks (PSBs)

Benefits Issues with PSBs

→ Rising NPAs
→ Governance and mis-management
→ Unable to achieve goal of financial inclusion universally.
→ philosophy of 'Government has no business to do business'.

Benefits of privatisations

① operational efficiency, profitability
② creating "too big to fail" banks
→ DSIB has 2 private banks along with SBI

- ✓ (iii) New technology and global integration
- (iv) Increased competition

Issues may still exist after privatisation

- ① Issue of financial Inclusion - Private banks may be reluctant to operate in rural areas or hilly areas.
- ② Achieving targets of under PSL (priority sector lending)
- ③ Rising cases of NPA into private banks.

Way forward

According to Narshimhan Committee, India should have 3-4 big public sector banks.

Strong regulatory measures and privatisation on case by case basis is the way forward.

RBI Working group recommendation

Q5. What do you understand by circular economy? Examine the significance and issues associated with respect to circular economy in India. 150 words

Circular economy refers to economic model which encourages reuse, recycle, remanufacture of products.

Significance

- ① Economic : - formalisation of economy
- cost of input reduces
- efficiency of product enhances
- reduction of import of strategic products
[eg] steel

- ② Environmental
- solid waste decreases

- pollution/emission in production reduces
- Harmful impact of mining - leaching, deforestation is checked.

③ Social:

- Purchasing power increases because of cost reduction
- New avenue of employment.

④ Technological - Boost to investment & new technology.

Issues

- High initial investment and technology cost
 - Resistant to change-
 - Products like plastic can't be reused more than 2-3 times.
- Economic Survey 2018-19 mentioned about National Policy on Resource Efficiency. It can be good starting point to implement circular economy.

Conceptual understanding is first

Q6. Critically examine the significance of gig sector economy in India. 150 words

Gig economy refers to new trend which include platform workers (Uber), free-lancers, home-delivery services etc. Due to COVID-19, significance of gig-economy has increased.

Significance

- Employment avenue to semi-skilled, skilled population
- Enterprise :-
 - flexibility in hiring & firing
 - outsourcing becomes easy.
 - cost reduction
- Economy - Rise in sharing economy model
 - Technological advancement
 - e-commerce boost

Issues with Gig Economy

- lack of credible data & information
- Social Insecurity
- In short time, very few jobs involve skill upgrading
- Wages less than minimum wage

Way ahead

With rising number, government has to come with policy for gig-workers. Providing avenues of social security, in labour code on social security 2019 acknowledges importance of this sector for Indian economy.

(your conceptual understanding of this topic and contextual discussion is fine)

- You need add content enrichment by adding some data / facts / P.E. / Portrade. *(Refer Model for the same)*

Q7. Discuss the reasons the Indian is not self-sufficient in Pulses production and the significance to be self-sufficient in this. What measure you will suggest for the same? 150 words

Despite being highest producer of pulses in the world, India imports pulses and suffers nutrient deficiency. Consumer importer

Reasons

① Government Policy

high MSP for wheat and rice has skewed cropping pattern in their favour
- lack of physical procurement of pulses

② Market - Fluctuating prices of pulses in the market doesn't help farmers about forecast for next season.

③ Irrigation: Though pulses can be grown in less-rain areas, however unpredictable monsoon and lack of irrigation facilities

Cultivation on less Area → Price volatility

Post Harvest Challenges ← Reasons → MSP Policy mostly relating to Rice & Wheat
Irrigation and unpredictability of monsoon

discourage pulse production.

- ④ farm size - low farm holding (1.08 ha/et) results in pulse production for household use not for commercial purpose in general.

Significance for Self Sufficiency

- Cost of Import decreased
- Nutrition security
- Climate Agro-climatic conditions favourable to pulses will see more pulse growth.
- Hedge uncertainty of monsoon and climate change.

Measures

- ① High MSP & physical procurement (more decentralised procurement)
- ② cooperative farming - help small & marginal farmers
- ③ Implementation of Price Support System (PSS) Under PM-AASHA

→ your conceptual understanding and contextual discussion is in

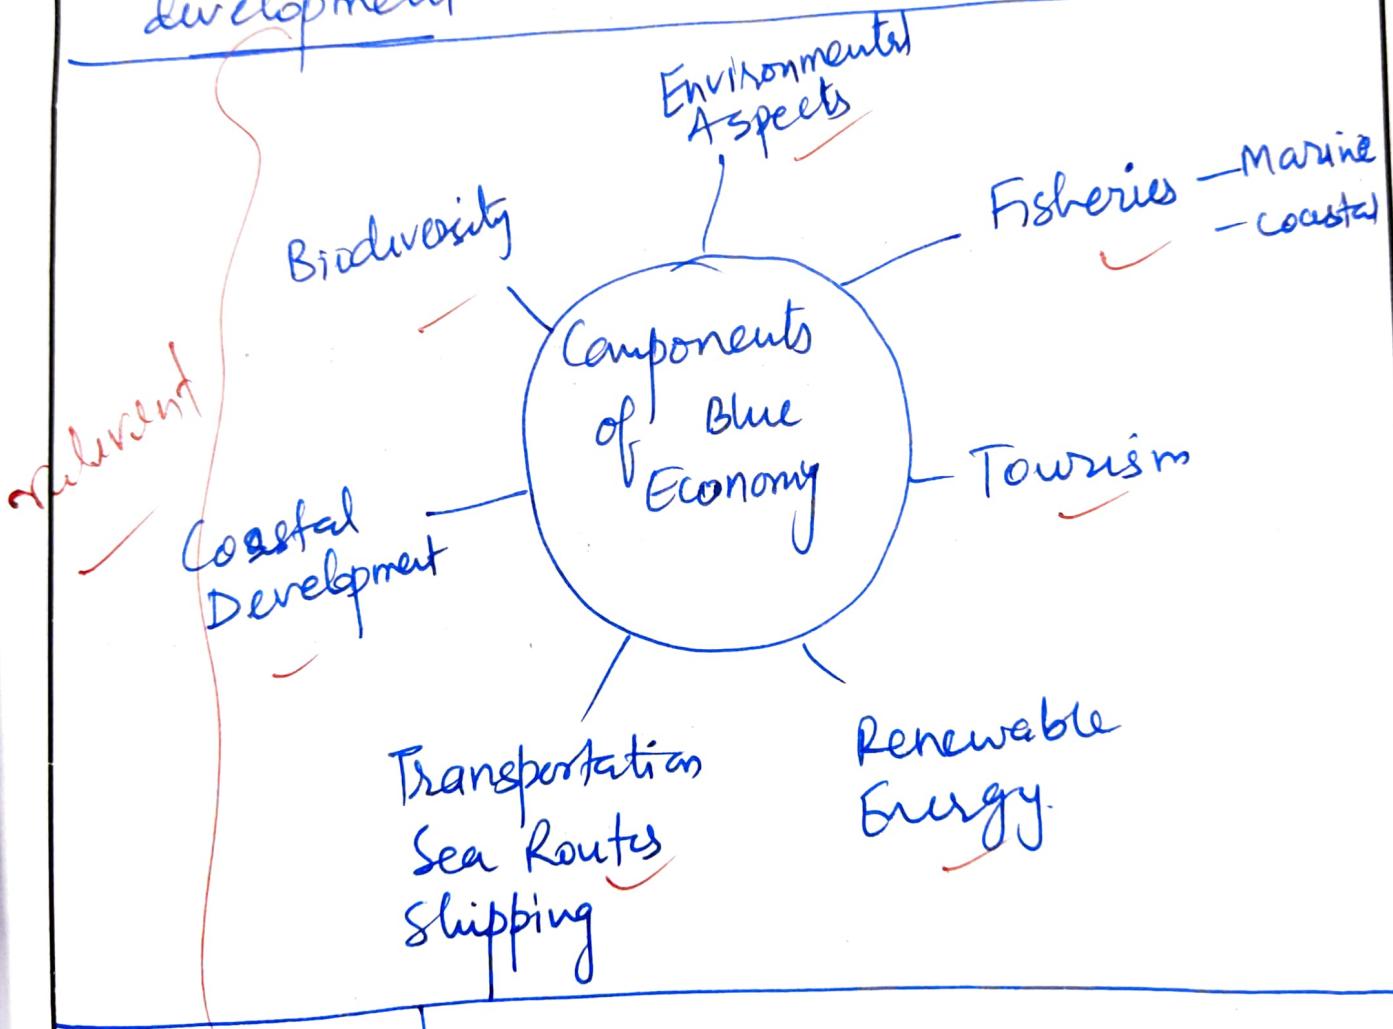

→ Concept enrichment and contextual justification need to work -

Q8. Analyze the causes behind uncatered blue economy in India and its significance. 150 words

Blue economy is sustainable development of ocean resources for economic development.

Significance

- ① Fisheries - Food & nutrition security
- source of livelihood & poverty alleviation

IAS Mentorship

By Reyasat Ali & Team | 8090528260 Telegram WhatsApp Call

- Conceptual Context*
- ② Tourism - Sea-surfing, scuba-diving
- Economic source as tour guide
 - ③ Renewable Energy - Wave energy, OTEC
- Modules at sea bed
 - ④ Important sea-lane of transportation
 - ⑤ Coastal development - connectivity, infrastructure

Causes for Untapped Potential

- ① Economy v/s Environment - Recent coastal zone Management guidelines and controversy
- ② Large sum of investment
- ③ Infrastructure development for tourism, ports
- ④ Long gestation period
- ⑤ Pollution and environmental degradation, climate change

Government steps

- Sagar mala Project - port led development
- Samudrayaan project - Indo-Pacific policy
- Blue Economy if tapped can help India achieve its goal of 5-trillion USD economy at early

Q9. One aspect behind fertilizer subsidy is that it supports farmers and hence food security, however it is associated with many other不利 outcomes also. In the light of above statement critically examine the fertilization policy in India. 150 words

Fertilisers account for second highest part of subsidy (~80,000 crore) after food subsidy.

Fertiliser Policy of India

Nutrient Based Subsidy (NBS)
Regime

Retention Price System (RPS)

Urea

fertilisers including N, P, K, Ca, S, Zn, Mg. as nutrient.

General
Relevant

- Government provides subsidy to companies.

Assessment

- Policy has not been able to stop high fertiliser subsidy. Because Urea (2/3rd of subsidy) is still out of NBS system
- For other fertilisers (DAP, MOP), market has been deregulated, however recently subsidy under this has also been increased.

Way Ahead

- ① For Urea →
 - Need to bring under NBS regime
 - Till the time, other reforms should be implemented
 - DBT in Urea subsidy
 - Fixing subsidy on number of bags
 - Vigilance against black marketing
 - Promoting diversifying Urea Company
 - Promoting efficient production by companies

Fertilisers subsidy is crucial for Indian Agriculture. It should be made more efficient.

Q10. Do you think that minimum support price (MSP) can solve the issues related to fluctuating farmers income or there is much more need to do to make Minimum support price to make it Maximum support policy? Provide your analysis. 150 words

Minimum Support Price (MSP) is the minimum amount provided by government to farmers. It is announced for 23 crops (+3). However MSP policy has not been able to solve farmers issues of low income.

Int'l
@IC

Issues with MSP regime

Santa Committee
61.
2015

- Benefitted few farmers (< 10%) - Ashok Dalal Committee
- High MSP for wheat & rice resulted in skewed cropping pattern
- Helpful to big farmers. (Though 85% farmers of India are small and marginal)
- Issues with APMCs
- Regional variation - Eastern India where Green Revolution 1.0 couldn't reach, did not benefit from MSP. unlike others.

Correlated

MSP → Maximum Support Policy

Maximum support policy includes support by government in multiple dimensions.

① Reforms in MSP - higher MSP for other crop

to nudge production according to agro

climate zone

- Procurement

of other crops (oilseeds, pulses)

② Market Intelligence :

- Advance estimation of demand

- Monitoring prices of produce and notifying best price (eNAM)

③ Focus of perishable items, horticulture fruits

④ Development of warehousing, cold storage

⑤ Promoting cooperative farming - reap benefits

of economies of scale and good price negotiating power.

Reforms are needed to double farmers

~~complaints~~

income.

contractual liaison - general

Q11. Examine causes and the correlation between the high inflation and low demand in the economy in recent period. Suggest suitable measures for both issues. 250 words

Indian economy is facing high inflation (largely food inflation) and low economy growth (-7% in FY 2020-21) due to low demand.

Reasons

A High Inflation

① Food Inflation

- Due to COVID-19 induced supply chain disruptions

② Increased government spending.

- Fiscal stimulus package of 20 lakh crore under Aatma Nirbhav Bharat

③ Lowering Interest Rates by RBI

at global level

④ Supply chain disruptions caused prices of imported prices go up. Hence overall inflation in economy rose.

By Reyasat Ali & Team | 8090528260 Telegram WhatsApp Call

B) low Demand:

- COVID 19 induced lockdown and subsequent restrictions
- Slowdown due to industrial stagnation
- Household savings increased due to uncertainty.
- Shocks of previous reforms of demonetisation and GST to informal sector.
- Reduced purchasing power due to job losses.
- Reverse migration caused many household to subsistence living.
- Weak consumer sentiments.

Correlation

IAS Mentorship

By Reyasat Ali & Team | 8090528260 Telegram WhatsApp Call

Measures: The situation is similar to stagflation condition. Hence both fiscal and monetary policy are needed to address it.

① Fiscal Policy - Income support to household

- Consumption credit (PM-Kisan)

- Investment in infrastructure (Market wages)

- Industry sops - low tax, lower compliance. (No of pending days.)

② Monetary Policy - Moratorium of loan for SMEs.

- Transmission of lower interest

to economy.

- Definancing.)

③ Structural Reforms are needed

- flexible labour and land policy to attract businesses

- focus on sunrise and labour-intensive sector

- Agriculture support

Hence comprehensive policy are needed

to deal with such situation.

(Conceptual understanding is good)

- Add recent contextual issues like unemployment (Coronavirus)

(Civil
aid
Wise
etc.)
