IAS Mentorship

By Reyasat Ali & Team | 8090528260 Telegram WhatsApp Call

A mind all logic is like a
knife all blade, it makes the
hand bleed that uses it.

Mary Shelley in her novel
"Frankenstein Monster" mentions
about a scientist who used all
his logic to develop a human
like monster. Soon the monster started
intruding into his personal life
and created havoc in the city.
It killed his close friends, fiance and
family members. He soon realized
his mistake, but it was too long.

The above incident highlights
how just using logic without
emotions, values can lead to
disastrous consequences. The scientist

mentioned above used Ais
scientific logic properly but
failed to integrate emotions and
values with Ais. logic. This indeed
made Ais hand bleed !!

In this essay, we will
examine the perils of only
using logic and how it creates
havoc. We will see the need to
integrate emotions, ethics and
values with logic. Also we
will delve into methods of
integration of logic with
ethics and values.

A mind all logic: Successful
recipe for a disaster.

Logic refers to the
ability to reason and think
rationally. It is the only
thing that distinguishes man
from other animals. It has been
at the base of human evolution
and scientific advancement from
industrial revolution 1.0 to 4.0

However, just resorting
to logic has many limitations.
Firstly just using logic can
lead to many wrong decisions.
Sometimes there is need of
intuition and gut feeling to

IAS Mentorship

make the right decision.

To illustrate, Purnell
Stanford in 1974 was
deployed in Russian Submarine.
He received a false warning
about possible nuclear attack of
USA. Warlike protocol & logic
required him to retaliate
immediately with nuclear
strike, he used his
intuition to not fire.

Secondly just using
logic would often keep
one boxed up in ones
comfort zone. This would

inspire one to take risk & explore the less travelled by path.

Thirdly, logic cannot provide explanations for many things that do exist. For instance, logic cannot explain the existence of God, paranormal activities, life after death but we know they do exist.

Can they explain why do birds chirp? while they say "it is for making call and survival" but why not any

prevent the thrill of
adventure & exploration.

Robert Frost in Road

Not Taken -

"Two roads diverged
in a yellow wood . . .
and sorry I could not
travel both . . .

I chose the one that was
less travelled by . . .
and that has made all
the difference."

Here, logic would say
one to choose the safe &
the most travelled way
path. But human spirit would

Thus the history of mankind though had been shaped by logic, but the role of ethics & emotions cannot be ignored. However, logic is also essential for scientific progress & advancement. But it should be in sync with emotions and values.

To conclude, logics give us an outer sanction to think but ethics, human spirit, values provide the basic edifice upon

which the structure
should be built. without this
basic edifice, the entire
structure would collapse
just like Frankenstein's
monster that killed
its own master.
